ELEVATING ACCESSIBILITY

Travel from one floor to another with simplicity and style with a smooth, quiet Bruno Connect home elevator.

Bruno's Connect is a free-standing elevator that can be installed nearly anywhere in your home thanks to an independent rail system. While Connect home elevators do not need to be attached to a wall to operate, units can be installed very closely to walls to maximize open space in your home.

Give yourself ongoing peace of mind with a Bruno home elevator, knowing that you have safe and easy access throughout your home – now and in the future.

Multiple Sizes

Choose the Bruno Connect model that matches your individual needs and space: Compact, Classic or XL. Whether one or two people need to travel in the elevator at a time, Bruno has a solution. Take your laundry or pet along for the ride, too!

CONNECT COMPACT

MOBILITY MEETS LUXURY

Stylish Design. Acrylic panels give open, modern appearance.

Versatile Location. Bedroom, kitchen, dining room, closet - locate almost anywhere in the home!

Quiet Ride. Exceptionally smooth, quiet ride from start to finish.

Integrated Safety. Entrance ramp is less than one-inch transition. In-cab phone for emergency use.

Back-Up Batteries. Lowers elevator if there is a power outage.

Access Restriction. Prevents door from opening or lift from functioning.

Technology. Solid materials combined with superior engineering create a robust, dependable unit.

Wireless Remotes. Use in-cab button or a wireless remote to operate elevator.

AVAILABLE OPTIONS

Enhance your elevator ride by opting for a convenient built-in seat for added comfort.

Add a cab handrail to augment your stability or opt for a handrail equipped with integrated operational controls to reinforce your balance and enhance ease of operation (standard on Connect XL).

Choose an automatic power door opener for easy entry of the elevator.

Ask your dealer for more information about Bruno Connect home elevator options.
